

# CRYPTO WATCHTOWER WHITE PAPER

[www.cryptowatchtower.io](http://www.cryptowatchtower.io)

## Crypto Watchtower

Crypto Watchtower was created to help people make informed decisions about Crypto investing. Blockchain is a revolutionary technology, that we have the pleasure of witnessing grow and evolve firsthand. The biggest risk in our opinion to Blockchain is the insecurity and volatility of the market brought about by misleading and false projects. Watchtower seeks to provide more certainty into Cryptocurrency projects from a fundamental risk rating perspective as opposed to apeing into a project based on Fear of missing out and hype.

Watchtower's objective is to identify Scam and high-risk tokens to prevent monetary loss to new and inexperienced Crypto investors.

Utilising our Charts, Smart Contract audits and rug pull scanning utility, Watchtower seeks to provide early detection of Scams and share this knowledge openly to the Cryptocurrency community.

The motivation to create Watchtower by our developers stemmed from a number of community members being scammed and well-known tokens being rug pulled without any remorse from the scammers.

With the growth of DeFi tokens scams are becoming more frequent and harder to track.

A reliable utility is necessary to assist with Crypto investment into safer projects.

In order to protect investors and assist with the adoption of Blockchain and Cryptocurrency, Watchtower will provide the Anti-Scam utility for the benefit of the whole Blockchain community.

A “Rug Pull” Scanner utility is currently a necessity in the decentralised exchange market which Watchtower is working to provide.

An Example of our utility can be viewed on our telegram page in anticipation of our website utility roll out in July 2021.

# Token Information

---

(Launched on Pancake Swap 27/06/2021) Market Cap at 29/06/2021 (\$1M)

# About

---

The start up funds to begin development were invested by CEO of Watchtower Joseph Faker who has been doxed along with a number of members of the Watchtower team.

Some of the development work is outsourced to a Solutions delivery team that work closely with the developers. Solution delivery team works under a Non Disclosure Agreement.

The Website development has already started with Website design UI already released to current holders.

Watchtower has already begun providing reviews and audits on tokens awaiting launch to community members through telegram and twitter.

A number of Projects that have been audited and test already in our utility have been Identified as Rug pulls and investors were warned with successful results in preventing monetary loss.

Our utility is live on our telegram and discord and is currently free for the community to use:
